

Installation Diagram for Shower Panel

1. Wall Plug ϕ 6*25
2. Wall Bracket
3. Screw ST 4*30

SHOWER PANEL INSTALLATION

1. Installation of the panel
Determine hole positions. Drilling holes - refer to the sizes in the diagram (overleaf). Actual installing measurements should be determined according to the wall bracket behind the panel, to drill the holes in the wall and put in wall plugs. Hold the shower panel vertically.
2. Connection for hot and cold water.
Use soft pipe to connect the shower panel to the joints for hot and cold water.
3. Fix the two wall brackets with 4 tapping screws (ST3. 5*30)
4. Adjust the wall brackets behind the shower panel so as to set the gap between correctly.
5. Hang the shower panel on to the brackets and fix the product to the wall with screws.
